ENHANCING E-COMMERCE
EFFICIENCY WITH A ROBUST MIDDLE
OFFICE

SAP Commerce Cloud

Company Information

Company Name : Hisense Group Co., Ltd

Headquarters : Shandong, China

Industry : Consumer Products

Web site : <https://www.hisense.com>

No of Employees : 90,000

Founded in 1969, **Hisense Group** is a leading Chinese home appliance manufacturer with a diverse product range, including **multimedia, home appliances, IT systems, and modern services**. Committed to integrating cutting-edge technology into its offerings, Hisense aims to be a **trusted global brand**. The company operates **29 industrial parks and 20 R&D centres worldwide**, with an extensive international presence. Hisense products are available in **over 160 countries and regions**, solidifying its position as a key player in the global market.

Developing a Scalable Middle Office for Global E-Commerce Growth

Challenges 🚧	Solutions 💡	Outcomes ✅
Fragmented Global E-Commerce 🌐 – Managing multiple regional platforms was complex and inefficient.	Unified Digital Platform 🔗 – Implemented SAP Commerce Cloud for a centralized, scalable e-commerce ecosystem.	Seamless Global Operations 🌍 – Standardized platform streamlined processes across 160+ countries.
Limited Personalization 🎯 – Inconsistent customer experiences across markets.	AI-Powered Personalization 🤖 – Enhanced recommendations and dynamic content delivery.	Improved Customer Engagement 💬 – Higher satisfaction and conversion rates.
Complex Order & Inventory Management 📦 – Disconnected systems led to inefficiencies.	Integrated Supply Chain & ERP 🔄 – Synchronized real-time inventory and order tracking.	Faster Fulfillment & Efficiency 🚀 – Reduced delays and optimized logistics.
Scalability Issues 📈 – Expanding into new markets was slow and costly.	Cloud-Based Infrastructure ☁️ – Enabled flexibility and quick market expansion.	Future-Ready & Scalable 🔥 – Rapid global rollouts with minimal disruptions.
Siloed Data & Insights 📊 – Lack of centralized analytics for decision-making.	Advanced Analytics & AI 📊 – Data-driven insights for demand forecasting and trend analysis.	Smarter Business Decisions 🧠 – Optimized sales strategies and operational efficiency.

"With SAP Commerce Cloud at its core, our business middle office seamlessly automates and unifies operations, providing greater control over global e-commerce. This foundation is pivotal in driving our targeted 25% revenue growth in international markets over the next five years."

Challenges and Objectives 1 of 2

What are the global challenges and business challenges of **Hisense** of using SAP Commerce Cloud in tabular format

Global Challenges 🌐	Business Challenges 📊
Expanding Across Diverse Markets 🌐 – Managing multiple regions with varying regulations and consumer behaviours.	Fragmented E-Commerce Systems 🔗 – Disconnected platforms led to inefficiencies and inconsistent customer experiences.
Localization & Compliance 📄 – Adapting to different tax policies, payment methods, and language requirements.	Complex Order & Inventory Management 📦 – Lack of real-time tracking caused delays and inefficiencies.
Scalability & Performance 🚀 – Ensuring seamless digital growth without compromising speed or stability.	Limited Customer Insights 🔍 – Disjointed data made it difficult to personalize and optimize marketing efforts.
Cross-Border Logistics & Supply Chain 📦 – Managing global shipping, warehousing, and fulfilment efficiently.	Slow Market Expansion ⏳ – High operational costs and rigid IT infrastructure slowed international growth.
Competitive E-Commerce Landscape ⚔️ – Staying ahead of fast-moving industry trends and consumer expectations.	Siloed Business Operations 🏢 – Lack of integration between sales, marketing, and service teams hindered efficiency.

Challenges and Objectives 2 of 2

What are the global challenges and business challenges of **Hisense** of using SAP Commerce Cloud in tabular format

Project Objectives

Develop a centralized overseas e-commerce middle office that seamlessly connects e-commerce platforms, logistics partners, inventory systems, and the SAP ERP.

Streamline and automate global e-commerce operations for improved efficiency and scalability.

Eliminate digital roadblocks to ensure seamless data flow and enhanced business agility.

Why SAP

Hisense has relied on SAP as a trusted partner for many years, benefiting from:

- The adaptability and scalability of SAP Commerce Cloud.
- The deep expertise and product knowledge of SAP Services and Support.

Project or Use Case Details

Due to the inefficiencies and errors associated with manual handling, Hisense sought to establish a middle office for e-commerce that seamlessly integrates all systems.

After a 15-month collaboration between SAP Services and Support and Hisense's IT team, the project successfully went live across four countries, serving both B2B and B2C operations.

By leveraging SAP Commerce Cloud as the core of its middle office, Hisense has automated operations, enabling review extraction, keyword matching on e-commerce platforms, full inventory visibility, and seamless EDI integration.

A key highlight of the project is the innovative "within-app SaaS" architecture. This is built on:

- **Label-Based Access Control (LBAC)** for role-based authorization
- **Data Access Governance (DAG)** for controlled data access based on user groups
- **SAP Commerce's restriction data query** for secure data isolation

This architecture ensures data separation across six business dimensions and allows administrators to assign precise role-based access in each country. As a result, Hisense achieves seamless business, function, and data isolation within a single cloud environment, creating a scalable foundation for future growth.

Project or Use Case Details

Business or Social Benefits:

- **Optimized Operational Costs** through enhanced visibility and efficiency.
- **Minimized Infrastructure Needs** with reduced hardware dependency.
- **Streamlined Global Management** for better oversight of international e-commerce.
- **Seamless Digital Integration** by eliminating technological barriers.
- **Data-Driven Insights** to support smarter business decisions.
- **Comprehensive Customer Journey Tracking** for deeper engagement.
- **Enhanced User Experience** leading to higher customer satisfaction.

IT Benefits:

- **Leverages SAP Integration Extensions** for seamless system connectivity.
- **Unified Data Management** across products, orders, finances, inventory, and more.
- **Flexible Third-Party Integration** with marketplaces like Lazada, Shopee, and Tokopedia.
- **Enhanced Transaction Processing** through streamlined checkout and payment systems.

Benefits and Outcomes 2 of 2

People Related – Personal Perspective

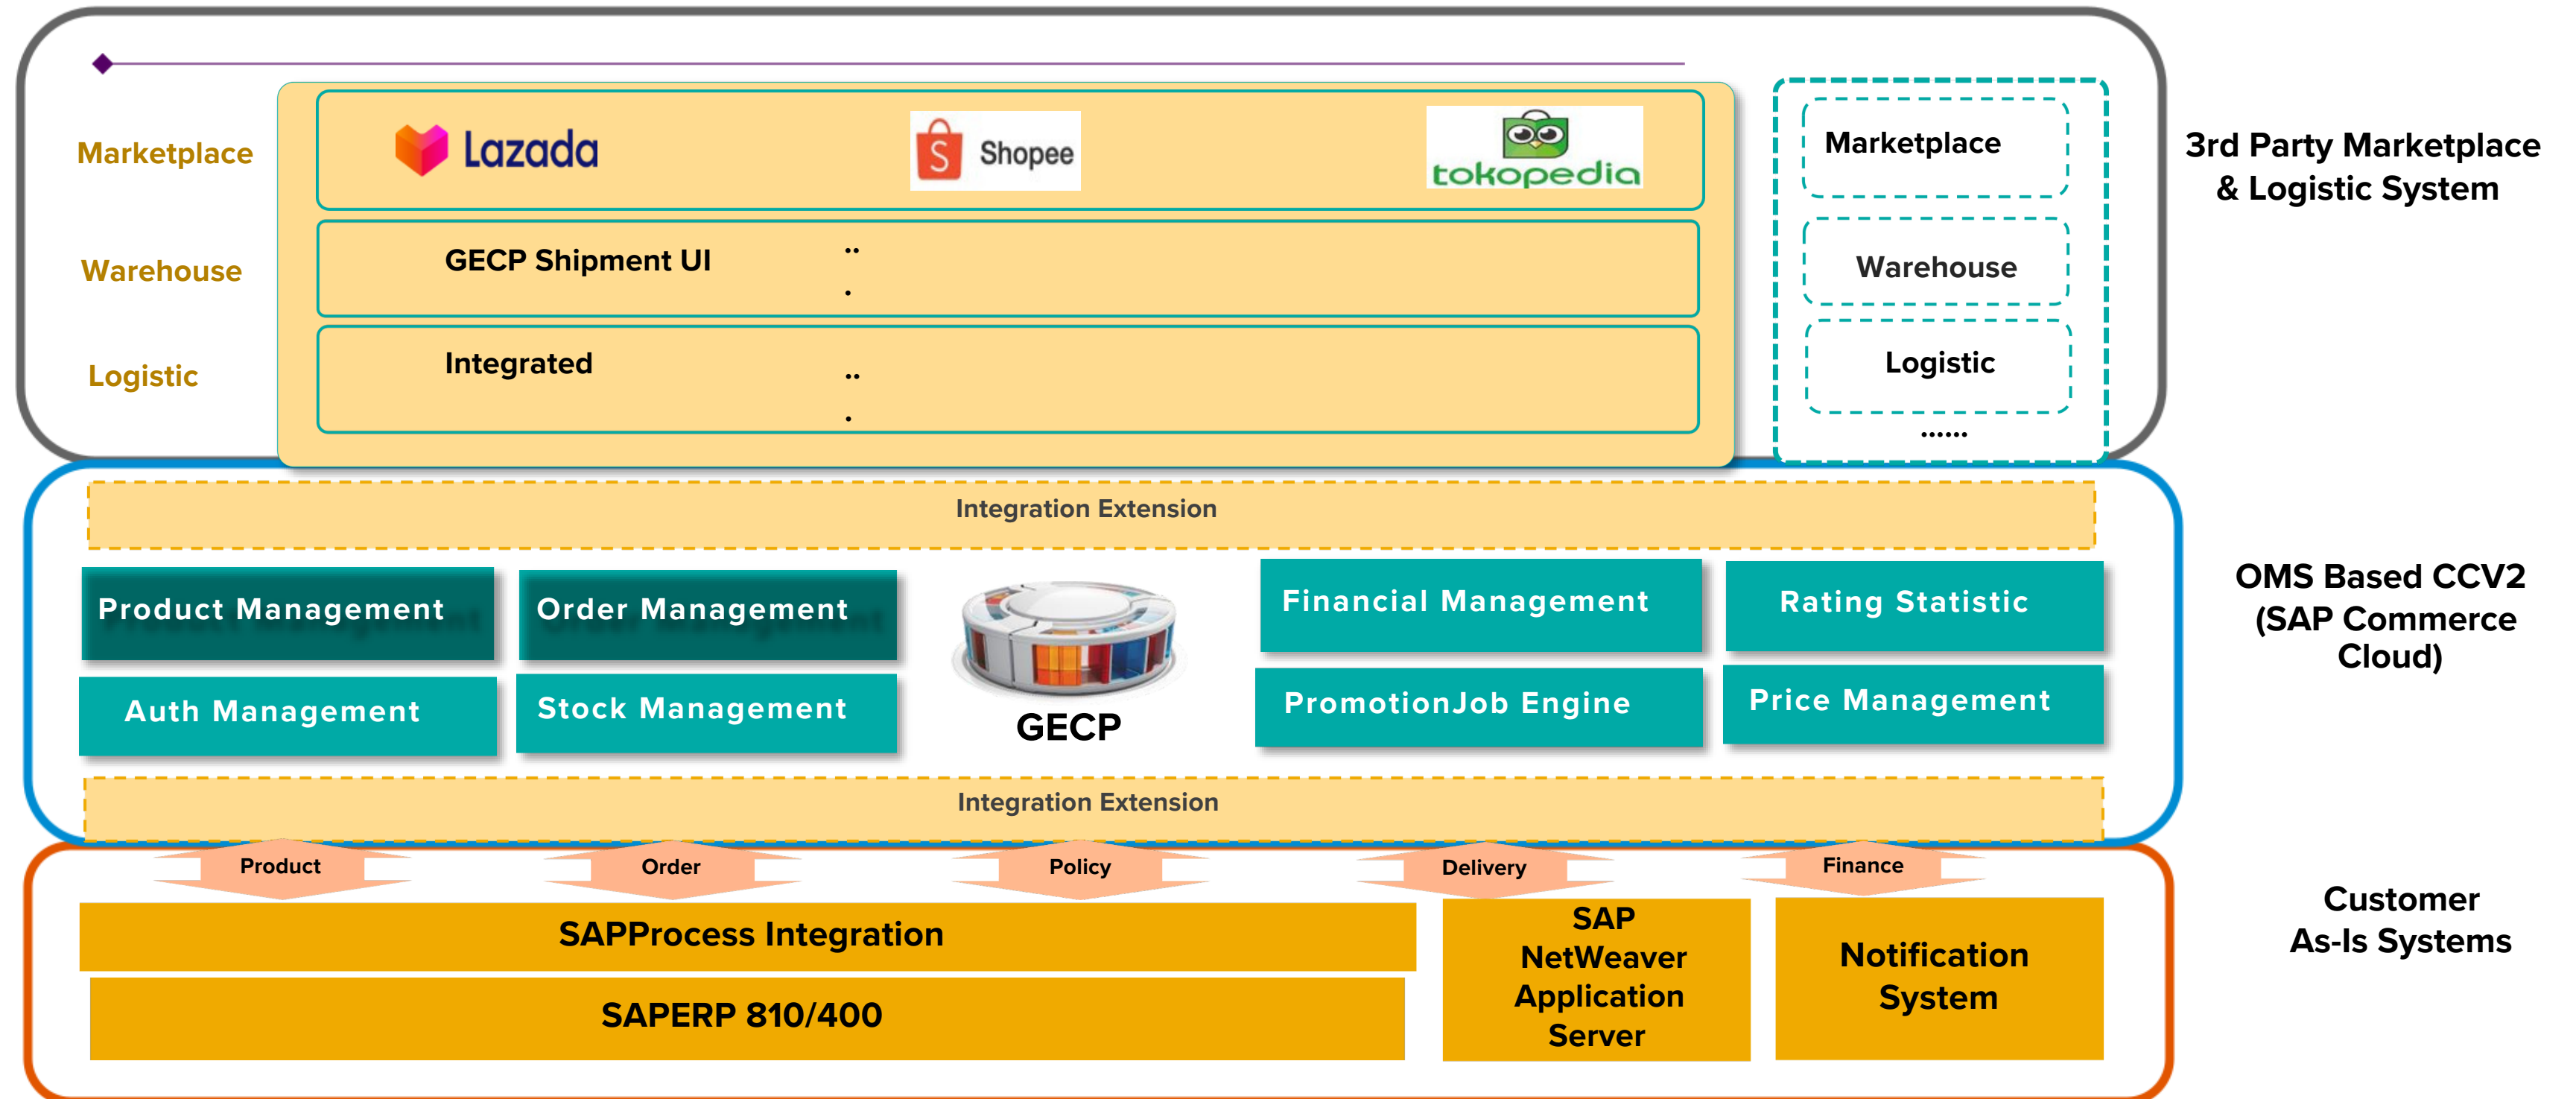

Improved collaboration between teams, as digital barriers are removed among departments ▪ Enabled sales departments to always be up-to-date on what customer mostly need, improving working experience and customer satisfaction

“We desired to meet the ever-changing customer demands. Thanks to review extraction and keyword match brought by SAP Commerce Cloud, our dreams came true. Judging from reviews, ratings and keywords, we are allowed to interpret what products are in the urgent need of customers, therefore improving customer satisfaction.”
